

The AIRFIX DRAW ALIGNER is an essential tool for auto body technicians performing dent repair work. Its patented design features a non-adhesive, recessed seal that can be replaced in seconds. Additionally, four vacuum pads help keep the gasket from slipping, making the system even more durable. It's easily one of the most reliable dent-pulling systems on the market.

INNOVATIVE AND PATENTED DESIGN

- The suction cup plate is equipped with 4 rubber pads, which absorb the shearing forces when pulling.
- The surrounding seal is recessed without glue.
- The seal and the pads are easily replaceable.

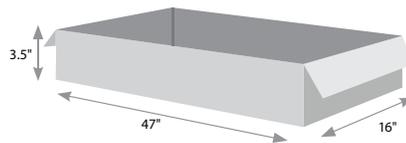

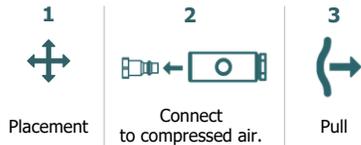

POWERFUL AND EFFECTIVE PULLING

- Pulling capacity of up to 770 lb throughout the entire height of the unit. Maximum pulling height of 52". Crank winch with 1/4" wire rope (3,300 lb tensile strength). Slide system allows you to adjust the pulling height in seconds—no tools required.
- Angled gear to facilitate downward pulling.

ERGONOMIC DESIGN

- Lightweight (68 lb) and easy to move with two wheels.
- Low noise level achieved by a high performance silencer.

OPERATION

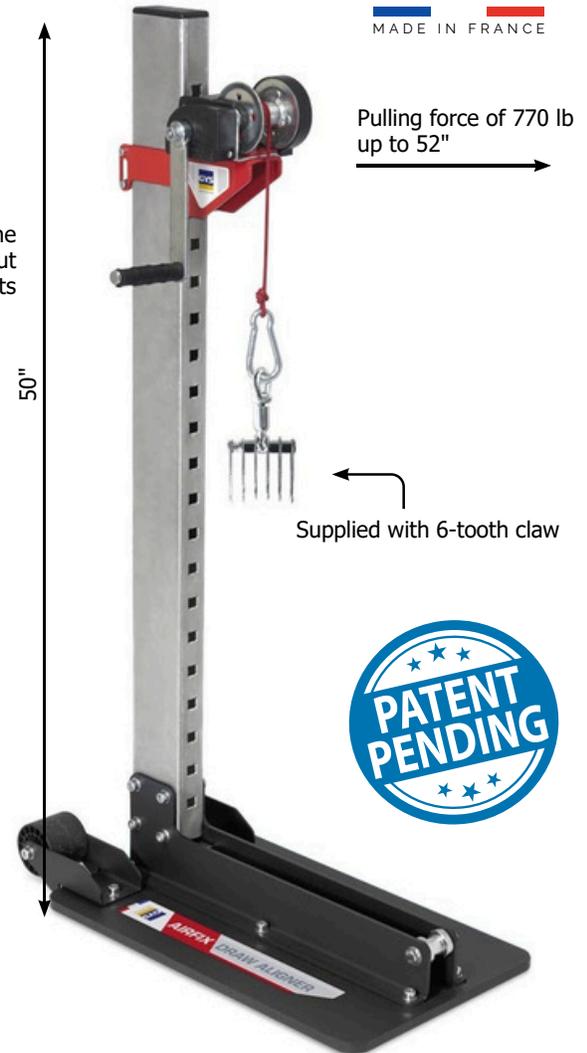

SPARE PARTS

Wire rope	079588	78"
Seal for plate	079571	68"

Change the height of the winch instantly without removing any parts
