

Designed for modern collision repair, the GYSPT PTI GENIUS Plus delivers true OEM-level resistance spot welding performance in a fully integrated, production-ready system. Combining a lightweight dual-sided welding gun with pneumatic over-opening, simplified arm positioning, and an extended motorized balancing system, it provides exceptional mobility, controlled movement, and operator safety throughout the vehicle. Engineered for stability and reduced fatigue in daily production environments, the system maintains consistent positioning without uncontrolled movement. A patented quick-release cable system allows fast gun removal for service, while the 7" full-color interface ensures clear visibility and intuitive control in day-to-day operation.

## TRUE OEM PERFORMANCE

- **Up to 14,500A of controlled welding current** - engineered for HSS, UHSS, and Boron steels
- **High production speed** — up to 15 welds per minute in automatic mode
- **Integrated transformer gun** reduces energy demand and operates on a 50A fuse
- **Fully liquid-cooled system** (transformer, arms, and electrodes) for consistent, high-duty cycle operation
- **Up to 1,349 lbf (600 daN) clamping force** to meet OEM repair requirements

## NEXT-GENERATION BALANCING SYSTEM

- Motorized overhanging boom with extended working range
- Adjustable counterbalance system for controlled gun positioning
- Patented quick-release cable locking system for fast, secure welding gun removal
- Designed to maintain stable, controlled positioning without uncontrolled movement during operation.
- 90° folding arm for space optimization in tight shop environments

## INTELLIGENT WELDING CONTROL

- **Automatic parameter recognition** — the system detects and applies optimal welding settings
- **7" full-color display** with intuitive navigation and clear production visibility
- **Weld traceability with USB export** for documentation and reporting
- **Integrated spot counter** to monitor electrode cap life and maintenance intervals
- **Tool-free arm changes** for fast adaptation between applications

## DESIGNED FOR DAILY PRODUCTION

- At just 27.3 lbs, the dual-sided integrated transformer welding gun is supported by an adjustable counterbalance system that delivers stable, near-weightless control across the full working range.
- **360° gun rotation** for unrestricted access across panels, pillars, and structural components
- **19 ft liquid-cooled interconnection cable** for extended reach around the entire vehicle
- **Pneumatic over-opening (3" clearance)** faster positioning in tight repair areas
- **Motorized boom height adjustment** to quickly adapt to varying vehicle sizes
- **90° folding arm design** to optimize space in compact shop environments

## PRECISION G-ARM SYSTEM

- **Wide range of G-arms and specialty electrodes** for full vehicle access, including small-access applications
- **Automatic coolant connection** upon installation
- **Integrated brass dovetail connection system** provides secure, precision alignment with automatic electrical and coolant engagement — enabling one of the fastest arm changeovers in its class.

## SYSTEM EXPANSION OPTIONS

- **Single-Side Repair Kit** - for additional versatility in limited-access applications
- **Full range of G-Arms, electrodes, and consumables available**  
Scan QR code to explore full G-arm configurations and application coverage.
