Pneumatic Dust Extraction System for Professional Body Shops

The GYS DUST EXTRACTOR PRO 2 is a high-performance pneumatic vacuum extraction system designed for efficient sanding dust removal in automotive repair workshops. With dual connection ports, it allows connection of either two sanders or a sander and a vacuum block for added flexibility. Its patented automatic filter cleaning system eliminates manual maintenance, while full ATEX certification ensures safe operation during aluminum body repair.

Two independent connection points:

Save time and increase efficiency by connecting two tools simultaneously for greater efficiency.

Supplied without sander or block. (088535)

Supplied with both on Complete (091436)

Large 20L storage capacity: Carry and store up to 10 boxes of sanding discs.

Supplied with a collection bag.

Supplied with two hoses, 4 metres - Ø 29 mm.

Side storage compartments x2:

Additional storage space for cleaning spray and sanding discs.

Ergonomic twisted earth cable, 2.5m.
For ground connection (ATEX requirement).

Manual or AUTO position, patented automatic start system.

iAUTO mode only works with a motorised tool (sander). Each lever is independent.

GYS Dust Pro 2 Extractor

Art. 087897

INNOVATIVE
CRTE

The pneumatic random orbital sander features a high-precision motor that delivers stable, consistent sanding performance — even under high pressure in demanding environments. Its efficient dust extraction system reduces airborne particles by up to 60% for a cleaner workspace. Designed with a low center of gravity and a perfectly balanced sanding pad, it provides exceptional control and comfort, making it ideal for extended use.

ADVANTAGES

- Delivers high sanding performance with no backward rotation — even under pressure exceeding 30 kg.
- Up to 60% dust extraction efficiency for a significantly cleaner work environment.
- Powerful, lightweight, and perfectly balanced for durability and consistent workshop performance.

WHAT'S INCLUDED

- Pneumatic random orbital sander
- Quick coupling
- Ø 150 mm sanding disc (pre-mounted)
- Service wrench

PRODUCT PAGE
