

The ERGO Door Lift is a maneuverable lift to enable a single individual to safely remove or install a door from a car or light commercial vehicle. Designed to help improve day-to-day workshop tasks, it saves time and reduces the effort required to handle heavy doors weighing up to 110 lbs.

Adjustable retaining bar with **2 quick-release latches** to adapt precisely to the profile of the door (max. 12 in).

**Hand-cranked winch** for accurate door alignment on the hinges.

**Handle** for relocating the unit throughout the workshop.

**Tool holder** (wrenches, screwdrivers, etc.)

**2 casters with brakes** to keep the unit in position as close to the vehicle as possible.

**Built-in storage device** for retaining bar.

**Compatible with door heights of up to 81 in.**

**Rubber support** to keep the door securely in place and prevent damage to the paintwork.

**Easy to maneuver** 4 caster wheels.
